** A "weight" is a value we assign to a criterion that changes how much impact the individual score for that specific criterion has on the overall outcome. This is a way to put more emphasis on certain criteria.

## Tiebreakers

**In the event of a tie only, a 0.5-point "boost" will be given to:**

- First Nation requestors (which would break a tie between a First Nation project and an FNCFS Agency project in favour of the First Nation project);
- Requestors that have not previously received any construction funding under the FNCFS Program (which could help break a tie between 2 First Nation projects or 2 FNCFS Agency projects, for example); and
- The project that receives the highest score on Q5 assessing the scope of FNCFS program components delivered or the number of First Nations served (which could help break a tie between two First Nation projects or two FNCFS Agency projects where none of or both of the requestors have received construction funding previously).
